

Cardboard edge protectors

Cardboard edge protectors

Tubembal offers a large range of **cardboard edge protectors** for diverse use: support, packaging, protection and transport of goods.

The main function of the **cardboard edge protectors** is to protect, support and stow various kinds of materials, thus preventing them being damaged.

Standard applications

- Protection of pallets;
- Protection of fragile materials;
- Corner protection;
- Bobbin protection;
- Support for cardboard boxes.

Finish

- Application of sealant or adhesive tape on the inside;
- Brown or white exterior colour or, on request, other colours;
- Moisture resistant.

*Customized to customer needs by consulting our commercial department.

Benefits

- Extra resistance reduces damage during transport;
- Improves pallet stacking stability throughout the supply chain;
- Reduces the amount of overall packaging material by taking into account only the vulnerable areas;
- Generates cost savings by using less material;
- **Environmentally friendly** - made from a **renewable resource**;
- Improves **safety**.

Markets

- General Industry;
- Agro-food sector;
- Glass sector;
- Aluminium sector;
- Electronics;
- Furniture;
- Automotive;
- Other consumer goods.
